\* Color/Effect not available for art. 56104 & 56105

<sup>1</sup> Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process.

In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison.
